ServView 17 Enterprise

A new generation KVM drawer with optional high-density CATx switch and IP access

- 17" Samsung industrial grade panel
- 1280 x 1024 resolution with 16.2 million colours.
- 104 notepad keyboard with full numerical keypad.
- One-man installation slides for quick and easy install.
- High-density integrated CATx KVM switch for one or two users.
- Secure and flexible KVM over IP access.

Enhanced KVM Drawer Design

The ServView 17 Enterprise is the optimum rack-drawer server management solution. It is economical, flexible in configuration and has a new aesthetic and ergonomic design. The rack-drawer ships as standard with both PS/2 and USB connectivity, 17" Samsung monitor, trackball mouse for enhanced precision and 104 keyboard with full numerical keypad. It is also available with most European keyboard language layouts

Optional High-Density CATx Switch Integration

The 1U KVM drawer is available with an integrated 16-port or 32-port CATx KVM switch for high density server management environments. Servers can be placed up to 40m from the KVM switch and connected using USB or PS/2 server access modules. The integrated switch can be cascaded with further stand-alone switches to accomodate up to 128 or 256 servers depending on the model. Because it uses standard CATx cables the solution is quick, tidy and economical to install. If you need two administrators to have simultaneous access to servers choose a dual user model and locate a second KVM station up to 300m away from the switch over CATx cable using the included USB KVM extender remote.

Optional High-Density CATx Switch Integration

For secure and flexible hardware level access to your servers from anywhere in the world, select a dual user switch with IP access. Your second user can then administer your servers using 128 bit secure IP access via a web browser, reducing travel time and server room traffic.

TECH SPECS

Height — 1U
Width — 19"
Depth — Mounting depth from 600-920mm
Connectors — Video in: (1) HD15 female; Keyboard/Mouse: (2) PS/2 6-pin mini DIN; Power: (1) IEC320
Dimensions — 4.4(H) x 44.2(W) x 65(D) cm
Weight — 16 kg
Resolution (Maximum) — 1280 x 1024 SXGA
Plug-and-Play DDC — EDID 1.3
Contrast Ratio — 700:1
Brightness — 300 cd/m2
Display Colours — 16.2 million
Viewing Angle — 150° horizontal x 135° vertical
Internal Power Supply — 100-240VAC, auto-sensing, IEC320
Operating Temperature — 0 to 50°C
Storage Temperature — 25 to 60°C
